Supabase

Hello,

I am writing to express my keen interest in the lead front-end role at Supabase. I have a strong passion for creating elegant interfaces coupled with robust APIs and a track record for delivering quality code within deadlines. I am able to collaborate with designers and other developers, working synchronously or asynchronously.

I am currently working at Welz Urgent Care New York, as a full stack developer where I maintain the platform and upgrade with new features.

Find my portfolio in the link below.

https://www.vonnie.io/

I look forward to the opportunity to discuss how my skills and experiences can benefit Supabase.

Sincerely,

Pius Kariuki
